

Future Song

Hey you, tell me all about your future in the world -
the future of this world - o yeah.

It's really time to ask yourself about your future in this world.
And in this land and in this country. And on all continents. It's really
time to ask about the future of this world. Tell me something about it ...
right now. ... I wanna hear it !

**It's time to realize the thing that's shining through
reality as we all know.**

**This world's future is just open wide for you ! Hey hey !
This world's future could be open wide for me, too, ohoho.**

Hey you, what about your future in the world -
the future of this world. What's your standpoint on the subject?
It might be time to ask yourself about your future in the world.
[and] in this land + in this country. From shore to shore.

**It's time to realize the thing that's shining through reality as we all
know.**

**This world's future is just open wide for you ! Hey hey.
This world's future could be open wide for you + you + me, too.**

Solo [Harp solo?!]

**It's time to realize the thing that's shining through reality as we all
know.**

**This world's future is just open wide for you. Hey hey.
This world's future could be open wide for you + you + me, too.
The blue pearl, our world, is spinning round + round + round +
round, round + round for all of us.
The blue pearl, our world, is spinning round + round + round +
round, yeah, for all of us. ... Is spinning round for all of us. Even as a
flat Earth, she's for all of us.**
