

Single Soul

-- -- 4x

You gotta yeaho in the ghetto. You just can see what they all over the world decide for you, or try to do so. Bad decisions for people in Africa, both Americas, Down Under + Europe, Asia with India. Hey, this kind of thinking is just a circle. It goes round + round. **O** yeah.

Much too many crawl digging in the dirty ground, having no water, no medicine, no education, no hope, having no peace at all.

That's what I call a tragedy! Don't let any single soul down. ...

! A, C, G - - - - 2x

We see + saw all this blood + horror, big crime + ignorance, misery + hardship almost everywhere. Easy to say no ... no, no. **O**, it's easy to say never.

Maybe you recollect what nonsense was performed by yourself - I mean the little things. Times when you give a no, instead of an appropriate yes. Such, I mean such stupid things - **lalalalala**. ... Whatever neurology says about.

You see the blinded blinded by the blind. But there's a light. **Come on we set sail to prove this, there must be our light.** For life, it can be so wonderful. **O**, it's so beautiful with only a few things that are being given solid ground.

So even right now, by the music, beat + sound. ... // We are part of the culture, we get loud. -- -- We are part of the culture, we get loud.

Don't let any single soul down. Don't let any single soul down. Come on let's make a world of real competition. We are **made** for real competition, just say fair competition.

Well, let the rich be rich a bit + the poor let 'm poor if they want to be poor. [poor poor poor] **But who wants to be way too poor?!** I guess no one. And it really needs to sing this song here again as throughout all of history + before.

Yeah, I'm gonna play it again. Don't let any single soul down. Don't let any single soul down. Don't let any single soul down. ...
